

My Library On Fingertips

MyLOFT is the ecosystem for all digital contents, providing seamless and reliable access to the subscribed e-Resources and web articles. Save and organise your varied digital contents across devices, and read whenever you want and wherever you like.

The library subscribes to both the Remote Access facility by which you can access all the subscribed e-resources from anywhere and the My Discovery can bring individual resources by title/ author search. MyLOFT works on the chrome browser with an extension.
